ABOUT ME

As a seasoned Software Developer with 7 years of experience, I specialize in both frontend and backend development, bringing expertise in HTML, CSS, JavaScript, TypeScript, React JS, Next JS, Node JS, Bootstrap, Tailwind CSS, Express JS, MongoDB, and MySQL. My career has been marked by a commitment to delivering innovative web applications that drive business growth and enhance user experiences.

I take pride in leading the development of several high-profile projects, including a full-stack web application for XYZ Company that significantly improved their online presence. My technical prowess is complemented by strong soft skills, including effective collaboration and problem-solving, enabling me to contribute positively to cross-functional teams.

With a Bachelor's Degree in Computer Science and ongoing professional development through industry conferences and certifications, I am dedicated to staying at the forefront of technological advancements. My passion for technology and its potential to address global challenges fuels my ambition to continually innovate and excel in the dynamic field of software development.

WORK EXPERIENCE

10/12/2023 – 10/05/2024 Homs, Syria

Frontend developer Yes For Online Services

- Developed innovative, reusable UI components and optimized web apps for increased speed and scalability, translating Figma designs into functional elements.
- Achieved a 30% increase in user engagement and reduced CSS code volume by 45%, contributing to a 25% smaller code base after migrating to React.
- Optimized the blogging process with responsive templates, saving the content team 5 hours weekly.
- Fixed over 60 front-end errors to improve application reliability.
- Overall, significantly enhanced user experience and operational efficiency.

01/05/2019 – 10/10/2023 Talabyaa, Lebanon

Full-Stack Developer Moon Light

- Collaborated with the development team on UI ideas and reviewed app requirements/designs, enhancing cross-browser compatibility to boost customer satisfaction by 40%.
- Identified web interactions and developed responsive UI components using React, improving front-end performance and reducing deployment times by 20% via CI/CD implementation.
- Wrote application interface codes in JavaScript, troubleshooting and debugging to ensure seamless user experiences.
- Implemented front-end architecture supporting UI concepts and documented changes, streamlining update processes.
- Demonstrated expertise in React workflows, contributing to efficient UI component development and deployment strategies.

Business or Sector Information and communication

01/05/2017 – 28/04/2019 Talabyaa, Lebanon

Junior Frontend developer Moon Light

- Leading Web App Developer specializing in Python, Django, and related tools, with a focus on database schema design, custom Python extensions, and RESTful API development.
- Promotes quality assurance through automated unit/integration tests, app performance optimization, scalability, and integration of third-party services/APIs.
- Authored detailed technical documentation and fostered collaboration among developers, designers, and stakeholders by actively participating in code reviews to boost team productivity.
- Leveraged expertise in Python, Django, and database schema design to develop robust and scalable web applications.
- Championed the use of RESTful APIs for seamless integration and data exchange between different systems and services.

HTML5 + CSS3 | Javascript (ES6) | TypeScript | Less/Sass/SCSS | SQL | Java | Python | React | Next.js | Backend: NodeJS, Express, socket.io | jQuery | redux | MongoDB | BigQuery | dbt | PostgreSQL | Terraform | node.js | Jira | Webpack | Babel | Gulp | Git | Docker | Jenkins | Linux | CI/CD | Google cloud | Figma | Adobe XD | Sketch | Invision | Zeplin | Bootstrap | Material Design | Ant Design | Semantic UI | TensorFlow | GitLab | GraphQL | stapi.js | PHP | Haskell | Jest | Enzeme | Adobe photoshop

PROJECTS

E-Commerce for a Clothing Company

Role: Lead Front-End Developer

The application features multiple functionalities such as login/logout, product lists, order overview, discount offers, profile section, shopping cart items, payment gateway creation, dynamically interactive and accessible search bar, available on multiple platforms like laptops, tablets, etc., smartphones (reactivity with React and Redux, CSS Modules).

Social Media:

Role: Full Stack Developer

The implementation of this app requires well-connected ends for various reasons such as security and management. The user interface consists of chat options, feeds, notifications, and a friend list implemented with React, Node.js, Express.js, and MongoDB.

3.Course Provider Platform

A platform that offers tutorials in the form of videos or text for every student just like Udemy and Coursera. All the details of the students, such as which courses they are taking, their details, etc., with React JS, Node JS, Express JS, and MongoDB.

Al-Fouad website

Role: Lead Front-End Developer

Technologies: React, Redux, CSS Modules

Al Baraka Bank website

Role: Full Stack Developer

Technologies: React, Node.js, Express.js, MongoDB

Street League Website

Role: Front-End Developer

Technologies: React, Redux, TypeScript, SCSS

Al Fujairah Store Website

Role: Full Stack Developer

Technologies: React, Node.js, Express.js, MongoDB
